## Switzerland mode choice

## Introduction

This case study deals with the estimation of a mode choice behavior model for inhabitants in Switzerland using revealed preference data. The survey was conducted between 2009 and 2010 for CarPostal, the public transport branch of the Swiss Postal Service. The main purpose of this survey is to collect data for analyzing the travel behavior of people in low-density areas, where CarPostal typically serves. A following study proposes new public transport alternatives according to the respondents' willingness to pay for these potential services in order to increase the market share of public transport.

## Data collection

The survey covers French and German speaking areas of Switzerland. Questionnaires were sent to people living in rural area by mail. The respondents were asked to register all the trips performed during a specified day and provide socioeconomic characteristics of themselves together with their households. The collected information consists of origin, destination, cost, travel time, chosen mode and activity at the destination.
1124 completed surveys were collected from respondents. For each respondent, cyclic sequences of trips (starting and ending at the same location) are detected and their main transport mode is identified. The data is used to generate the estimation database, with 1906 observations relating sequences of trips, psychometric indicators and socioeconomic attributes. It should be noticed that each observation is a sequence of trips that starts and ends at home. A respondent may have several sequences of trips in a day.

## Variables and descriptive statistics

The variables are described in Table 1 and 4. A summary of descriptive statistics for each variable is given in Table 5 .
Given the presence of missing data (coded as -1 ) an additional table summarizing the three affected variables (TripPurpose, ReportedDuration, age) after removing the missing cases is presented (see Table 6).

Table 1: Description of variables

| Name | Description |
| :---: | :---: |
| ID | Identifier of the respondent who described the trips in the loop. |
| NbTransfertsTP1 | The total number of transfers performed for all trips of the loop, using public transport (ranging from 1-9). |
| DureeTP1 | The duration of the loop performed in public transport (in minutes). |
| WalkingTimeTP1 | The total walking time in a loop performed in public transports (in minutes). |
| WaitingTimeTP1 | The total waiting time in a loop performed in public transports (in minutes). |
| DureeAuto | The total duration of a loop made using the car (in minutes). |
| CoutTP1 | Cost for public transports (full cost to perform the loop). |
| MarginalCost | The total cost of a loop performed in public transports, taking into account the ownership of a seasonal ticket by the respondent. If the respondent has a "GA" (full Swiss season ticket), a seasonal ticket for the line or the area, this variable takes value zero. If the respondent has a half-fare travelcard, this variable corresponds to half the cost of the trip by public transport.. |
| CoutAutoCHF | The total gas cost of a loop performed with the car. |
| TripPurpose | The main purpose of the loop: $1=$ Work-related trips; $2=$ Work- and leisure-related trips; 3 $=$ Leisure related trips. -1 represents missing values |
| CodageTypeCommune | The commune type, based on the Swiss Federal Statistical Office $1=$ Centers; $2=$ Suburban communes; $3=$ High-income communes; $4=$ Periurban communes; $5=$ Touristic communes; $6=$ Industrial and tertiary communes; $7=$ Rural and commuting communes; $8=$ Agricultural and mixed communes; $9=$ Agricultural communes |
| CodageUrbainRural | Binary variable, where: $1=$ Rural; $2=$ Urban. |
| CodeClassifLignes | Classification of the type of bus lines of the commune: $1=$ Centre; $2=$ Centripetal; $3=$ Peripheral; $4=$ Rabattement. |

Table 2: Description of variables

| Name | Description |
| :---: | :---: |
| frequence | Categorical variable for the frequency: $1=$ Low frequency, $<12$ pairs of trips per day; $2=$ Lowmiddle frequency, 13-20 pairs of trips per day; $3=$ Middle-high frequency, 21-30 pairs of trips per day; $4=$ High frequency, $>30$ pairs of trips per day. |
| NbTrajets | Number of trips in the loop |
| Region OR CoderegionCAR | Region where the commune of the respondent is situated. These regions are dened by CarPostal as follows: $1=$ Vaud; $2=$ Valais; $3=$ Delemont; 4 =Bern; 5 =Basel, Aargau, Olten; $6=$ Zurich; 7 $=$ Eastern Switzerland; $8=$ Graubunden. |
| distance_km | Total distance performed for the loop. |
| Choice | Choice variable: $0=$ public transports (train, bus, tram, etc.); $1=$ private modes (car, motorbike, etc.); $2=$ soft modes (bike, walk, etc.). |
| InVehicleTime | Time spent in (on-board) the transport modes only (discarding walking time and waiting time). |
| ReportedDuration | Time spent for the whole loop, as reported by the respondent. -1 represents missing values |
| CodeLangue | Language of the commune where the survey was conducted: $1=$ French; $2=$ German. |
| age | Age of the respondent (in years) -1 represents missing values. |
| X26_ActiviteDestination | The main activity at destination: 1 is work, 2 is professional trip, 3 is studying, 4 is shopping, 5 is activity at home, 6 is eating/drinking, 7 is personal business, 8 is driving someone, 9 is cultural activity or sport, 10 is going out (with friends, restaurant, cinema, theater) and 11 is other. |
| X281 | Frequency of trips related to the household (drive someone, like kids, or shopping), 1 is never, 2 is several times a day, 3 is several times a week, 4 is occasionaly. |

Table 3: Description of variables

| Name | Description |
| :---: | :---: |
| X284 | Most often mode used by the respondent to go to school as a kid ( $>10$ ), 1 is car (passenger), 2 is train, 3 is public transport, 4 is walking, 5 is biking, 6 is motorbike, 7 is other and 8 is multiple modes. |
| X286 | Main place of residence as a kid $(<18), 1$ is city center (large town), 2 is city center (small town), 3 is suburbs, 4 is suburban town, 5 is country side (village) and 6 is countryside (isolated). |
| X287 | Frequency of the usage of car by the respondent's parents (or adults in charge) during childhood ( $<$ 18), 1 is never, 2 is occasionally, 3 is regularly and 4 is exclusively. |
| X288 | Frequency of the usage of train by the respondent's parents (or adults in charge) during childhood ( $<$ 18), 1 is never, 2 is occasionally, 3 is regularly and 4 is exclusively. |
| X289 | Frequency of the usage of tram, bus and other public transport (not train) by the respondent's parents (or adults in charge) during childhood ( $<18$ ), 1 is never, 2 is occasionally, 3 is regularly and 4 is exclusively. |
| X311 | Number of persons in the household. |
| X312 | Number of kids ( $<15$ ) in the household. |
| X313 | Number of cars in the household. |
| X314 | Number of motorbikes in the household. |
| X315 | Number of bikes in the household. |
| X316 | Number of bikes for kids in the household. |
| X317 | Number of computers in the household. |
| X318 | Number of TVs in the household. |
| X319 | Internet connection, 1 is yes, 2 is no. |
| X320 | Newspaper subscription, 1 is yes, 2 is no. |
| X321 | Number of cell phones in the household (total). |
| X322 | Number of smartphones in the household (total). |
| X323 | House type, 1 is individual house (or terraced house), 2 is apartment (and other types of multifamily residential), 3 is independent room (subletting). |
| X324 | Do you own the place where you are living? 1 is yes, 2 is no. |

Table 4: Description of variables

| Name | Description |
| :--- | :--- |
| X325 | Number of rooms is your house. |
| X326 | Number of years spent in the current house. |
| X327 | Net monthly income of the household in CHF. 1 <br> is less than 2500,2 is from 2501 to 4000,3 is from <br> 4001 to 6000,4 is from 6001 to 8000,5 is from 8001 <br> to 10 '000 and 6 is more than 10 '001. |
| X328 | Gender of the respondent, 1 is man, 2 is woman. |
| X329 | Year of birth of the respondent. |
| X337 | Is equal to 1 if the respondent has a half-fare trav- <br> elcard. |
| X339 | Is equal to 1 if the respondent has a line-related <br> season ticket. |
| X340 | Is equal to 1 if the respondent has a GA (full Swiss <br> season ticket). |
| X341 | Is equal to 1 if the respondent has an area-related <br> season ticket. |
| X342 | Is equal to 1 if the respondent has a season ticket <br> that was is not in the list. |
| X346 | Represents the availability of a car for the respon- <br> dent: 1 is always, 2 is sometime, 3 is never. |
